**Safeguard your meals and enhance your image at the same time.**

Caterers and food service professionals told us they were tired of the awkward bulk and weight of traditional plastic carriers. Now there's a lighter, more convenient way to get food and beverages to your events safely—PROSERVE Insulated Carriers. Each of the professional grade carriers offers the most progressive thermal technology in the industry, yet are just one-third the weight of traditional plastic carriers. With seven sizes, there's one for every occasion. You'll be able to use and carry them proudly for years.

**Industrial-grade strapping with ergonomic handles**

Provide superior durability and easy one- or two-hand lifting. All strapping rated at over 1,000 pounds of pull force.

**Aluminum runners**

Allow metal or plastic pans to slide in and out easily.

**Rigid Expanded Polypropylene (EPP) insulation**

Insulates and protects food during loading, stacking, and moving.

**Double-stitched construction**

Ensures reliable performance for years of use.

**Easy-care nylon exterior**

Protects carriers against rips, tears, and stains. Complete with commercial-strength latches that close securely in a snap.

## Thermal Retention System: Four layers of protection

### Rigid interior insulation

Lightweight and over 300% stronger than Styrofoam<sup>®1</sup> polystyrene, Expanded Polypropylene (EPP) resists flaking, cleans easily, and provides uncompromising support.

### Non-woven polyester insulation

Nearly an inch thick, it's the same insulation used in high-performance cold-weather gear. Will not retain moisture or odors.

### Reflective vapor barrier

Helps maintain even temperature throughout the carrier, so foods maintain their ideal temperatures.

### Commercial-grade nylon exterior

Strong (840 denier) nylon surrounds and protects the inner layers.

The right accessories complete the system:

9F19

Carrier dolly makes moving multiple carriers—up to 325 pounds—easier than ever. Includes a retention strap and two locking casters.

9F20

Wire shelf keeps food containers organized and neat. Can be used in all end-loading carriers.

9F21

Blue Ice<sup>®</sup> Chiller extends the cooling properties for hours—less than 1° F of temperature increase in 24 hours.

SKU	ITEM WEIGHT	HEAT RETENTION (Heat loss per hour over 4 hours)	COLD RETENTION (Heat gain per hour over 4 hours)
9F12	10.6 lb	5.5° F	0.2° F
9F13	14.9 lb	6.0° F	0.4° F
9F14	17 lb	5.7° F	0.3° F
9F15	6.3 lb	5.8° F	0.5° F
9F16	11.1 lb	5.2° F	0.6° F
9F17	7.9 lb	*	n/a
9F18	11.3 lb	3.0° F	0.4° F

Hot testing performed with chicken broth. Cold testing performed with applesauce. \*Testing with two 16" pizzas held above 140° F for 90 minutes.

Lab tests prove it. PROSERVE carriers provide superior thermal performance, yet are only one-third the weight of traditional plastic carriers. The secret is the multiple layers in the Thermal Retention System. The temperature-controlling layers of lightweight, protective materials keep hot foods hot and cold foods cold through loading, transportation, staging, presentation, and serving. Guaranteed.

<sup>1</sup>Registered Trademark of The Dow Chemical Company

**PROSERVE** carriers keep hot foods hot and cold foods cold and allow you to pack, load, move, unload, and serve with confidence and ease. All carriers can be stacked for easier transportation, and are completely commercial dishwasher safe, so even maintenance is simplified.
