Sanitary Disposal System

Safe disposal of sanitary waste in women's washrooms is an every day need. Around the world, the disposal needs to be safe, responsible and with minimum harm to the environment. The TC Sanitary Bin by Technical Concepts is designed to do just that and provides a safe and hygienic way to dispose of sanitary waste.

Slim Design

The slim, attractive design, available in either a 3 or 5 gallon version, is easy to fit into washroom stalls.

Hands-Free Operation

The Sanitary Bin is pedal operated to limit direct contact with the user. The deep chute prevents waste adhesion and promotes better hygiene. The access is easy, convenient and safe.

Easy to Service

The contoured body shape of the Sanitary Bin is easy to clean, the smooth surface does not harbor dirt or germs. The dry system bins are lined so the interior is never soiled.

Clean and Hygienic

Effective for up to eight weeks, SaniSense Bin Deodorizer™ automatically activates when sanitary waste is placed in the Sanitary Bin. Pathogens and harmful bacteria are deactivated and restrained from multiplying, ensuring safe storage of soiled dressings. Unlike traditional deodorizers that merely camouflage, Technical Concepts eliminates odors with Microtrans™. A blend of chemistry and physics, Microtrans locks on to malodor molecules, kills bad odors and maintains freshness.

Sanitary Bins Features:
