

RANCILIO KRYO 65 OD

ON-DEMAND DOSING GRINDERS

DOSING GRINDER SPECIFICATIONS

The KRYO 65 OD is designed for high volume on-demand grinder and a perfect companion to any Rancilio espresso machine. It features a patented cooling grinder chamber which reduces heat from friction during grinding. The ergonomic design and quality of the KRYO 65 OD provide excellent stability even in situations of intense use.

The KRYO 65 OD can be activated automatically by inserting the filter holder, or by using the start button on the keypad, and ensures that the desired dose of coffee is ground instantly, whether automatically if in the “on demand” mode. The dosing system of the KRYO 65 can be easily programmed to a range of settings to fit the precise specifications of the user. It has a Micrometric Adjustment knob with lock which ensures consistent delivery and precise particle size. The ground coffee is then dispensed directly in the porta-filter basket. The porta-filter holder centers the porta-filter when dosing ground coffee.

ON-DEMAND AUTOMATIC DOSING

DOSING GRINDER STANDARD FEATURES
