## Specifications

**Heating system:** All components are mounted to the top cabinet ceiling, outside the food zone. Cabinets are designed to maintain temperatures between 120°F and 200°F. Heating elements are located behind the vertical ducts. The design of the heater, which is full length of the vertical duct, allows for optimal air flow and energy efficiency. Fan motor is mounted outside of the heated compartment. System is controlled using an electronic temperature control.

Units are completely insulated with high density foamed in place environmentally friendly, Kyoto Protocol Compliant, Non ODP (Ozone Depletion Potential), Non GWP (Global Warming Potential) polyurethane.
