

5.3 quart (5 liter) warming and holding equipment.
Available in black powder-coated steel or stainless steel body.

Get the power of a Glenray® Kettle in a smaller package with the new Glenray® Mini Warmer.

Use Tomlinson's Glenray® Mini Warmer for niche items with a small but devoted following. The Glenray Mini provides the flexibility to try new things in smaller batches, test market it, and expand your customer base! Enjoy greater control in portioning out cook/chill items and make smaller batches of scratch items. The mini warmer also goes places full-size kettles and warmers can't, meaning smaller operations can offer soups, stews, sauces, gravies, and dips while occupying a dramatically smaller footprint. Available in either black powder-coated steel or stainless steel body.

It all adds up to less waste, greater versatility, and a better bottom line.
