

## Disposable Gloves

Barrier control products are your first line of defense in the fight against foodborne hazards. Our gloves are tested to the highest standards and provide exceptional value. All gloves are made of USDA-accepted materials and are non-sterile, single-use and ambidextrous.

- Nitrile gloves offer extra strength and sensitivity. Nitrile offers dexterity, better abrasion and puncture resistance, and protection against many harsh chemicals.
- Non-latex gloves look, fit and perform like latex but without risk of latex allergies.
- Vinyl gloves are an ideal, economical alternative for the latex-sensitive user. Vinyl offers a snug fit, yet are easier to slide on and off than latex.
- Poly gloves are the lowest cost single-use hand protection.
