

Smell is the most evocative of the senses. Bad odors lower spirits. Clean, fresh fragrances enhance experiences and improve moods. "Arriba" air care systems are designed to give people a "lift" as they walk into a fresh, well-maintained facility. Our unique, easy bottom loading design is a user-friendly process that gives maintenance staff a lift, too!

**An Arriba solution to meet any facility preference!**

# Arriba™

AIR CARE SYSTEMS

## TAKING AIR CARE IN A NEW DIRECTION

# RAISING AIR CARE TO A NEW LEVEL

Offering a full portfolio of best-in-class choices

**Air care in today's Away From Home environment is not a luxury—it's essential for successful facility management.**

And yesterday's systems just can't deliver on the demands of today... Customers are looking for a greener profile. Lower cost in use. Greater effectiveness for the satisfaction of building occupants and visitors. Better Image. And promoting the kind of environment that helps everyone maintain good washroom hygiene.

## LIFT GEL HIGH EFFICIENCY AIR CARE SYSTEM

Exclusive MC<sup>3</sup>™ Multi-Phase Odor Cancellation Technology, premium fragrances, and quick-load design provide a superior solution for facilities that prefer gel systems for simplicity and economy.

## SNAP PROGRAMMABLE AEROSOL AIR CARE SYSTEMS

A full array of aerosol LED and LCD dispensers using both large and compact refills—all with the patent pending Arriba™ quick load design, advanced programming options, MC<sup>3</sup> Multi-Phase Odor Cancellation Technology and premium fragrances.

## TWIST ACS™ AIR CARE SYSTEMS

Breakthrough Advanced Capillary Science™ technology enables continuous air care with exceptional effectiveness and duration—far superior to traditional wicks. And, like all Arriba systems, TWIST features patent pending quick load design and breakthrough dispensing options, including the revolutionary Solaire™ active dispersion system that harvests light energy without batteries!

## SNAP PROGRAMMABLE AEROSOL AIR CARE SYSTEMS

**Electronically program intermittent bursts of air fresheners that are as effective on the last day as they were on the first.**

- Smart Chip technology enables advanced programming options.
- Patent pending Arriba™ quick load design and automatic refill drop-down make reloading a snap!
- All Arriba SNAP refills features MC<sup>3</sup>™ Odor Cancellation Technology and premium essential oils.
- Automatic drop-down shows when to replace refill.

### SNAP LCD

Incorporates a Liquid Crystal Display screen for programming of spray interval, hours of operation and days of use.

### SNAP LED

Features indicator lights to inform maintenance staff when batteries are low or refill is needed.

### SNAP LCD Compact

Convenient compact offers all the features and duration of the full-sized model.

# UNIQUE NEW GENERATION AIR CARE TECHNOLOGIES

The Arriba™ air care portfolio features groundbreaking technologies for superior performance, efficiency, and environmental sustainability.

## World's first green, active dispersion air care system!

The revolutionary, battery-free TWIST Solaire™ uses breakthrough light harvesting technology to energize the Arriba Turbo Fan for active dispersion of MC<sup>3</sup>™ odor neutralizers and premium fragrances.

## Innovative air care network for larger areas

Arriba is the first air care line to offer a networking solution for large washrooms or challenging spaces. Combine the revolutionary TWIST Solaire System with TWIST Passive systems for effective, widespread coverage at the lowest cost.

## Wide array of essential oil fragrances and intensities

Each Arriba line features a variety of popular, carefully crafted fragrances formulated with quality ingredients and premium essential oils.

## Automatic aerosol refill drop-down for easy maintenance!

Thanks to exclusive patent pending Arriba technology, after spraying 3,000 doses the SNAP aerosol refill partially drops to reveal a red band, alerting maintenance staff at a glance that it's time to change refills!

## Patent pending, one-handed load-from-the-bottom design saves time and money

Every Arriba™ system features the industry's most advanced refill loading process for safety, convenience and efficiency.

## Patent pending ACS™ technology

The Arriba TWIST family use groundbreaking Air Capillary Science™ (ACS) to ensure continuous dispersion of air freshener throughout the cycle. Unlike aerosols that offer intermittent coverage that dissipates between bursts or gels that fade in intensity over time, TWIST systems provide long-lasting, consistent air care.

## Active odor neutralization at the molecular level

MC<sup>3</sup>™ Multi-Phase Odor Cancellation Technology for ensured performance. MC<sup>3</sup> is a family of advanced malodor neutralizing agents designed for versatile environmental applications.

## Enhanced programmability for superior aerosol performance

No other air care system gives you as many options for air care management as the Arriba SNAP aerosols. Their easy programming allows facility managers to control hours of operation, spray intensity and duration and more.

## New directions in environmental responsibility

The Arriba portfolio highlights its eco-friendly profile with the introduction of the TWIST Solaire™ for **THE FIRST TOTALLY GREEN ACTIVE DISPERSION AIR CARE IN THE WORLD.** In addition, all Arriba categories incorporate new technologies to promote environmental responsibility including:

- **Totally recyclable TWIST and LIFT refills**
- **All refills are VOC compliant**
- **Auto stop-and-start and day/night features save on battery life**

# INNOVATION AND VERSATILITY TO CONTROL ANY AIR CARE SITUATION

**TWIST**  
ACS  
Advanced Capillary Science™  
AIR CARE SYSTEMS

**TWIST Passive**  
Positions the refill and incorporates a special venting design for maximum, continuous air freshening without the use of a fan.

**TWIST Fan**  
Features an energy saving battery-powered fan to accelerate the flow process for environments where you need increased dispersion intensity.

**TWIST Solaire™**  
Harvests natural or indoor light energy to power the fan without batteries. Solaire may be networked with TWIST Passive units to provide economical air care in larger spaces.

## Patent pending Advanced Capillary Science™ (ACS™) technology for longer-lasting air care guaranteed not to spill, leak or drip!

- Arriba™ quick load system—twist in refill from the bottom for greater efficiency.
- Twice the active air fresheners for greater effectiveness.
- Refills are VOC compliant and completely recyclable—no cans to throw out!

Featuring the revolutionary TWIST Solaire battery-free system for the greenest air care in the industry!

## CHOOSE THE SYSTEM THAT'S RIGHT FOR YOUR ENVIRONMENT

## A COLLECTION OF EXTRAORDINARY NEW TECHNOLOGIES

The state-of-the-art Arriba™ line features a collection of significant innovations across the air care spectrum.

### Exciting dispensing features

Enhanced programming for customized dispensing, Advanced Capillary Science™ utilizing patent pending technology, and the industry's first battery-free, light energy harvesting air care system.

### Superior odor cancellation technology and fragrance

MC<sup>3</sup>™ Multi-Phase Odor Cancellation Technology and premium essential oils ensure a pleasant environment.

### Sustainability

New energy-saving features to eliminate batteries, ensure VOC compliance and utilize totally recyclable refills.

### Patent pending quick load design

Push in refill from the bottom, one-handed, in seconds without opening the dispenser for easier, quicker maintenance.
