High Capacity Roller Grill

Nemco's roller grills have always been famous for their superior diehard cooking performance. 360° roller rotation prevents residue buildup, while individual roller heating elements ensure heating consistency with an extra roller for added capacity. These two models have slanted end panels that match the slanted rollers for merchandising. The 8033 and 8055 series come with one motor and two infinite controls. Infinite controls offer versatile temperature control, front and rear rollers have their own heat controls. The synthetic bearing and grease barrier double-protect components from grease, the rear rollers use a white grease barrier, front rollers use a black grease barrier. Easy access to the motor and chain from side panel. Removable drip pan makes for easy cleaning. Requires no ventilation system. The rollers come with GripsIt coating – turns even difficult-to-turn products and makes clean up easy for those sugarycoated products and breakfast items.

Standard Features:

- Rugged stainless steel construction
- Extra roller for added capacity
- Simplest installation – plugs into any outlet with corresponding voltage
- *GripsIt* Rollers
- Roller grills slant 7° for effective merchandising
- One motor operates rollers
- Rollers rotate at a complete 360° turn by means of a roller sprocket, motor sprocket and chain
- End bearing and grease barrier double protect against grease seepage
- One year parts and labor warranty
- cETLus & NSF Listed

Optional Accessories:

- 4" adjustable legs
- Polycarbonate Guards available for all roller grills; offers sanitary protection
- Heated and humidified Bun Warmers keep buns fresh and ready to serve
- Bun boxes come in a variety of sizes for great merchandising
- Stainless steel Condiment Bars and Stations provide a neat and efficient way to provide condiments
