- Single or double handled trays
- Stainless steel tray inserts to elevate foods
- Single or double sided configurations
- Back panel
- 230V, 50Hz electrical system*

* Inclusion of this option will alter the electrical specifications

Specifications

Merco Holding Cabinet keeps food hot, fresh and ready for easy assembly! Allows more flexibility in holding options for greater menu variety - go ahead, prepare and hold food prior to serving. The easy to maintain design and simple operation features reduce employee time spent on cleaning and training; increasing customer satisfaction by providing higher product quality (a great sandwich) in a shorter amount of time (increased speed).

Duo Heat: directly transfers heat from bottom with minimal heat loss while warm convected air flows from above. Provides consistent quality, improved freshness and extended hold times.

Cool Touch Exterior: keeps exterior surfaces cool while moist and crisp foods are held at proper serving temps.

Small Footprint: allows cabinet to fit in small operations and spaces with versatile configurations.

Stainless Steel Construction: sturdy, sanitary & reliable.

Stainless Steel Tray Seals: prevent moisture loss when installed. When removed, air flows through to keep product crispy. Removable for cleaning.

Programmable Menu (on some models): easily program temperatures for individual day parts and product zones. USB programmability for quick and efficient set-up and adding limited time offers.

CARECODE Enabled: Online easy access to Operations, Training, Service contacts, Parts, Accessories, Service Hotline & Service Tracking.
