**Utility Information**

Gas: Each unit has a 3/4" rear gas connection with a male NPT connector. Minimum supply pressure is 7" W.C. for natural gas and 11" W.C. for propane. All units require a regulated gas supply. Pressure regulator included. If using a flexible hose gas connection, the I.D. of the hose must not be smaller than the connector on the unit and must comply with ANSI Z21.69, providing an adequate means of restraint to prevent undue strain on the gas connection.

**Options and Accessories**

- Stainless steel stand
- Casters for stand
- Stainless steel plate shelf with or without cutting board
- Plated grids for fish
- 2" high insulator base for mounting on refrigerated base
- Battery Spark Ignition
- Briquette kit to convert radiant to briquette
- Radiant kit to convert briquette to radiant

**Miscellaneous**

- If casters are used with flex hose, a restraining device should be used to eliminate undue stain on the flex hose.
- For use in non-combustible locations only.
- Minimum clearance from noncombustible construction is zero.
- Install under vented hood.
- Check local codes for fire and sanitary regulations.
