

fitted sets

A fitted set is a table skirt and topper sewn together, providing an attractive table cover without the use of clips, pins,

Velcro or staples. Available in all pleat styles, simply drop over the table for a one-step set-up. The most popular style – the Flat Panel Fitted Set – is sewn with no pleats except for inverted pleats on the corners for a custom fit. The tailored fit and clean lines lends itself to a modern table setting. When ordering remember to include your

table length, width and height (e.g. 6' x 30" x 30"). Fitted Sets are available in all skirting fabrics (see pages 16/17).
