FOAMMASTER™

MODEL: FM800

PRODUCT INFORMATION

Expanding your menu with the FoamMaster™ FM800 is your key to a limitless range of flavored milk and coffee beverages – from a fruity iced drink, to a perfect latte macchiato, or even a classic espresso and far more. Thanks to the milk system for hot and cold milk foam, the chocolate dispenser and the Flavor Station with up to three different syrup varieties, this machine is a master of any imaginable coffee drink.

It also boasts an intuitive 10.4 inch touchscreen with four flexible operating modes tailored for both self-service and operated environments. This intuitive menu navigation enables simple and efficient operation.

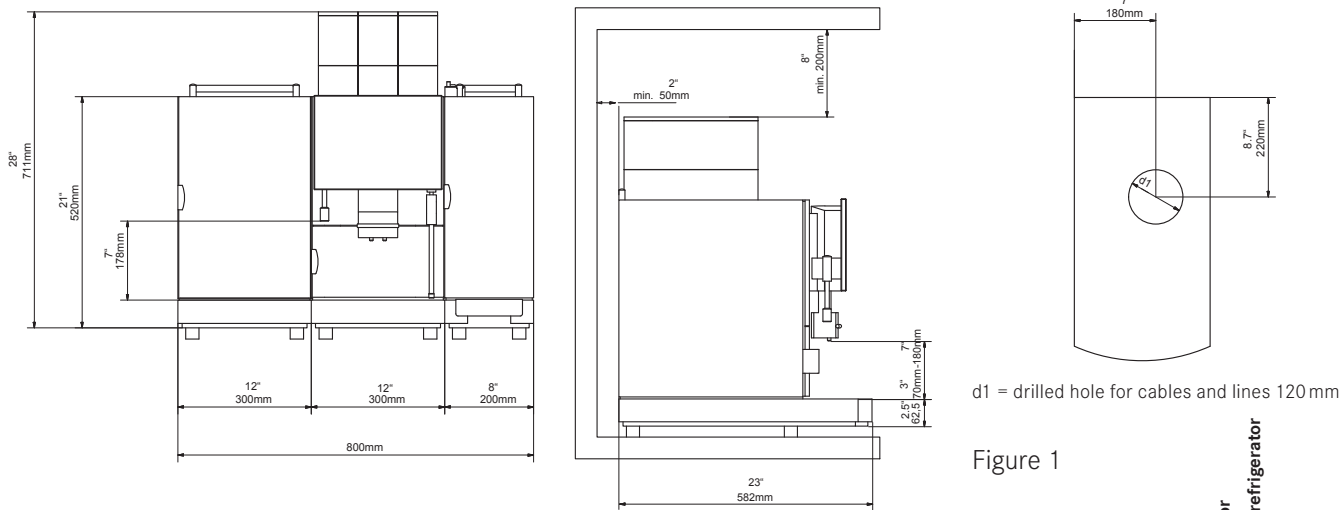

The FoamMaster™ FM800 is the perfect solution for quick-serve environments, convenience stores, restaurants, hotels and much more.

FEATURES

- 4 operating modes for efficient menu configuration
- Intuitive touch screen navigation
- 100 programmable beverages with 3 drink size options
- Programmable milk quality and temperature settings for each product
- One touch grind, tamp and brew – up to 150 espressos per hour
- Automatic outlet adjusts to appropriate cup heights for each product (up to 20oz cup)
- Standard programmable hot water outlet
- Automatic rinse program
- Professional installation and 1 year periodic maintenance program
- 18 months parts and labor warranty
- 24/7/365 customer support program

INSTALLATION INSTRUCTIONS

At your scheduled time of installation with an authorized Service Provider, the instructions and necessary requirements for a successful machine set-up and calibration are listed below. Please read the information carefully and follow these important steps:

1. The correct electrical outlet (L6-30R) as well as the correct size water lines and drain must already be installed. See Figure 1.
2. Running water and permanent power must be turned on at the site.
3. The holes for the water and electrical cables will need to be drilled in the table or counter top as shown in Figure 1 before a Service Provider is dispatched.
4. Coffee beans, all milk types, syrups and other ingredients to make your drinks are required.
5. Cups of each size drink being served at your facility are required for machine calibration.
6. Staff must be at the installation site for training on the programming, cleaning and use of the machine. If staff are not present, an option for a second trip of the Service Provider is available - please schedule this trip as soon as possible if needed.
